EDUCATION

Northeastern University

May 2028

B.S in Computer Science

GPA: 3.7/4.0

- **Concentration:** Human Centered Computing | **Minor:** Marketing
- **Relevant Coursework:** Object-Oriented Design, Algorithms and Data, AI, Systems, Mathematical Reasoning, Calculus 2, Introduction to Marketing, Discrete Mathematics, Physics 1

TECHNICAL SKILLS

- **Languages:** Java, C++, Python, Swift, TypeScript, C#, HTML/CSS, JavaScript
- **Framework & Libraries:** React, [Next.js](https://nextjs.org/), [Node.js](https://nodejs.org/), Tailwind CSS, NumPy, JUnit
- **Developer Tools:** Git, Linux, Unity, Figma, Prisma, PostgreSQL

PROJECTS

ClearStart

Jan. 2026 - Present

Skincare Web App (clearstart.vercel.app)

- Built a full-stack web application using Next.js, TypeScript, Tailwind CSS, and PostgreSQL, translating acne concerns into personalized, beginner-friendly skincare routines
- Implemented backend logic to transform quiz inputs into personalized AM/PM routines via REST APIs endpoints
- Developed UI components and state-driven flows to support onboarding, quiz navigation, and routine rendering

Dibs!

March 2025 - March 2025

PawHacks 2024 Winner

- Developed a peer-peer marketplace enabling college students to buy, sell and donate items from campus to campus with the goal of reducing waste and overconsumption with SwiftUI
- Led front-end user flow planning through rapid Figma prototyping, defining onboarding and browsing experiences before implementing designs in SwiftUI
- Collaborated through clear communication to align priorities and deliver core features within a 48-hour sprint

Calendar

June 2025 - June 2025

Java Project

- Collaborated with a partner using Git for version control to design and implement a Java MVC calendar application with a Swing GUI, supporting recurring events and timezone handling
- Iteratively built scalable features, including event series, multi-calendar support, and GUI enhancement

Road Racer

Feb. 2024 - May 2024

Video Game

- Led frontend gameplay development for a Unity-based 2D racing game in C#, collaborating with teammates to implement sprite animation, collision detection, and core mechanics

WORK EXPERIENCE

SGA Web Management Team

Jan. 2026 – Present

Web Developer

Northeastern

- Maintain and deploy production website updates via Squarespace CMS, resolving UI tickets while enforcing layout consistency and responsive behavior across the full site reaching 1,000+ users annually
- Implementing full-site redesign initiatives by conducting user testing, analyzing feedback, and iterating on UI improvements to enhance discoverability across 30,000+ search impressions

Beauty Content Creator

Sept. 2022 - Present

TikTok Influencer

- Built and scaled a consumer-facing digital content platform to 64K+ followers, using analytics-driven iteration to optimize engagement and content performance gaining over 8.6M+ likes
- Monetized platform through brand partnerships, generating \$20K+ in annual revenue by negotiating contracts and delivering performance-based campaigns with external stakeholders (Cetaphil, Fenty Beauty, Purito)
